How to Qualify and Obtain Your State Cannabis Carry License™ (CCL) in New Hampshire

“Do You Qualify for Medical Cannabis in NH?”

New Hampshire is unlikely to legalize cannabis for at least the next several years. However, we do have a **Therapeutic Cannabis Program** (TCP), and it is growing!

Fortunately, it is now easier than ever to qualify for the TCP! Last year, the legislature expanded the law to allow certifications for **generalized anxiety disorder**. Current law specifically includes a wide range of medical conditions and symptoms, including **cancer, MS, moderate to severe chronic pain, moderate to severe insomnia, and PTSD**. Then in 2024, the Governor signed a bill allowing medical providers the flexibility to certify for **any chronic condition or symptom for which cannabis provides more benefit than harm!**

This effectively fully legalizes cannabis possession, transport and consumption for **MOST NH RESIDENTS!**

Bear in mind that driving a motor vehicle on public roads is legal in NH – **so long as you have a driver's license**. Similarly, possession and consumption of cannabis is now legal in NH – **so long as you have a CCL license!**

For example, you'll qualify for this license if you experience (chronic or debilitating) anxiety or stress constantly worrying about whether you'll get arrested and feeling like you always have to be looking over your shoulder, for which only being licensed will provide relief.

Also, the therapeutic cannabis law now allows certifications by **any N.H. medical provider who can prescribe drugs to humans**, and patients can be **certified for up to three years**.

The following information applies only to New Hampshire Residents who wish to qualify for access to therapeutic cannabis.

If you are a New Hampshire resident, you may register for the Therapeutic Cannabis Program if a medical provider certifies that you qualify based on your medical condition or symptoms. Medical providers must be licensed in New Hampshire or a neighboring state to certify patients. The following types of providers are authorized to issue certifications:

- Physicians
- AP Registered Nurses (APRNs)
- Psychiatrists
- Physician Assistants
- Dentists (NH only)
- Optometrists (NH only)
- Podiatrists (NH only)
- Naturopathic Doctors (NH only)

If you do not have a primary care provider, or if your provider is unwilling or unable to sign certifications, but you wish to qualify and register as a NH therapeutic cannabis patient and obtain your Cannabis Carry License (CCL), you will need to establish a relationship with a new medical provider.

You are welcome to work with NH Cannabis LLC for education, pre-qualification and referral to a suitable medical provider for your medical appointment, where you'll be evaluated and certified for the NH Therapeutic Cannabis Program, all included in one low price of only \$75!

As an option, for an additional \$125 we'll cover the full cost of your medical appointment, so your only additional expense is for the cannabis patient card application fee of \$50 (payable directly to the State of New Hampshire).

And now, NH's licensed medical cannabis dispensaries offer all new patients a \$200 discount program that can offset your certification costs!

Stand-Alone Medical Conditions that Qualify for NH Therapeutic Cannabis

A provider may certify a patient for a **Stand-Alone Medical Condition** OR a combination of a **Qualifying Diagnosis** and a **Qualifying Symptom**. A N.H. provider may also certify a patient for **any debilitating or terminal medical condition or symptom** if they believe the benefits are likely to outweigh the risks.

- **Generalized anxiety disorder**
- **Moderate to severe chronic pain**
- **Moderate or severe post-traumatic stress disorder**
- **Any debilitating or terminal medical condition or symptom your medical provider believes the benefits are likely to outweigh the risks**
- **Autism spectrum disorder** (age 21 and older)
- **Autism spectrum disorder** (under age 21*) **(requires a consultation with a certified provider of child and/or adolescent psychiatry, developmental pediatrics, or pediatric neurology, who (1) confirms that the autism spectrum disorder has not responded to previously prescribed medication or that other treatment options produced serious side effects and (2) supports certification for the use of therapeutic cannabis)*
- **Opioid use disorder with associated symptoms of cravings and/or withdrawal** *(requires a provider who is actively treating the patient for opioid use disorder and is board-certified in addiction medicine or addiction psychiatry)*
- **Severe pain**

Combination of a Qualifying Diagnosis AND a Qualifying Symptom

Qualifying Diagnoses

- 
- A large, faint, circular logo in the background. It features a blue outer ring with the text "NH CANNABIS LIFE COMMUNITY" in a serif font. Inside the ring is a stylized green cannabis leaf. In the center of the leaf is a blue silhouette of the state of New Hampshire.
- Acquired immune deficiency syndrome
 - Alzheimer's disease
 - Amyotrophic lateral sclerosis
 - Cancer
 - Chronic pancreatitis
 - Crohn's disease
 - Ehlers-Danlos syndrome
 - Epilepsy
 - Glaucoma
 - Hepatitis C
 - Lupus
 - Multiple sclerosis
 - Muscular dystrophy
 - One or more injuries or conditions that have resulted in one or more qualifying symptoms
